Kodin Code Session Report - Sakshi Kumari

Date: 17/9/2026, 2:42:16 pm

QUESTION

```
Demonstrate Single level Inheritance in Java .
```

Question images

AIM

```
To Demonstrate single level inheritance in java.
```

ALGORITHM

```
start.
step1: Create a class animal.
step2:Create a class dog which extends the animal class.
step3:then,Create a class sol with object dog d1.
stop.
```

SOLUTIONS

File: untitled.java

```
class Animal
{
    String name;
    void show()
    {
        System.out.println("Inside show method");
        System.out.println("Name:"+name);

    }
}
class Dog extends Animal{
    int age;
    void Eat()
    {
        System.out.println("Eats Dog food");
    }
}
class untitled
{
    public static void main(String[] args)
    {
```

```
        Animal a1=new Animal();
        a1.name="Big Animal";

        Dog d1=new Dog();
        d1.name="Dog";
        d1.show();
        d1.Eat();
    }
}
```

PROGRAM OUTPUT

```
Inside show method
Name:Dog
Eats Dog food
```

CONCLUSION

today we learn how to Demonstrate single level inheritance in java.
